PRODUCT FAMILY

V-Manage

Documents & Operations

V-Manage runs the operational core: documents, capture, records, correspondence, meetings, tasks and audit — the everyday work of a well-governed organization.

Illustrative overview · September 2026 · veevra.com

Capabilities in V-Manage

V-Manage brings together 7 operational capabilities, each usable on its own or together.

Document Lifecycle

Version control, OCR, retention policies and AI classification across the document lifecycle.

Document Capture

Scan, classify, OCR, validate and deliver documents into the repositories you already run — no migration.

Records Management

Retention schedules, legal holds and defensible disposal for physical and digital records.

Correspondence

Bilingual correspondence management with a visual workflow designer and end-to-end audit.

Council & Committee

Structured agendas, live voting, automated minutes and meeting intelligence.

Task & Follow-Up

Assign, delegate, prioritize and follow up work across departments with SLA enforcement.

Internal Audit

Risk-based planning, fieldwork, finding management and automated audit trails.

How it works together

Every family is an independent operational product you can adopt on its own. It works with V-Core for identity and access, and AI is an optional enhancement, governed through AICP when you choose to use it.

Deployment

Cloud, private cloud, on-premises or fully air-gapped — wherever your data must live. Your models, data and control stay yours.

Explore & get in touch

See the capabilities in detail, or ask us to map them to your systems and sector.
